Introduction:

HG323RGW (XPON 1GE(WAN/LAN)+1FE(LAN)+Wi-Fi 4 HGU ONT) is a broadband access device specially designed to meet the needs of telecom operators for FTTO (Office), FTTH (Desktop), FTTH (Home), SOHO access, and video surveillance access. The ONT is based on high-performance chip solutions, supports XPON dual-mode technology (EPON and GPON), and also supports IEEE802.11b/g/n Wi-Fi 4 technology and other Layer 2/Layer 3 functions, providing data service for carrier-grade FTTH applications. In addition, the ONT also supports the OAM/OMCI protocol, and we can configure or manage various services of the ONT on the VSOL OLT.

The ONT has high reliability, is easy to manage and maintain, and has QoS guarantees for various services. It conforms to a series of international technical standards such as IEEE802.3ah and ITU-T G.984.
